L 化工厂简介 Laboratory

嘉兴南洋万事兴化工有限公司，地处浙江省嘉兴市乍浦港区，占地 20 亩，目前拥有甲基四氢苯酐生产流水线四条，年生产能力 30000 吨，是浙江南洋集团的第二家化工子公司。

由于浙江南洋集团原化工厂的销售供不应求，因原厂区面积不能满足生产需求，公司的进一步发展受到了严重束缚，需扩大生产规模以满足公司进一步良性发展要求。因此，成立了嘉兴南洋万事兴化工有限公司，并与国外公司合作，引入甲基四氢苯酐生产专业技术人员，采用国外先进生产工艺和设备，专门致力于生产 WNY 系列液态环氧树脂固化剂 - 甲基四氢苯酐，利用嘉兴港区的区域优势和资源优势，建成全球最大的酸酐固化剂生产基地。

公司生产工艺严格，设备先进，技术力量雄厚，保证产品质量稳定，性能优越，已通过 ISO9001 质量管理体系认证和 14001 环境体系认证。公司是全国环氧树脂技术应用学会会员单位，在国内外电子、电工、绝缘材料、灌封材料等领域已占有一席之地，在客户群中具有良好的口碑。公司秉承“保证一流质量，保持一级信誉”的经营理念，坚持“客户第一”的原则为广大客户提供优质的服务。欢迎来电洽谈业务！

Jiaying Nanyang Wanshixing chemical co., LTD., is located in Jiaying Zhapu port zone, Zhejiang, China, with a floor area of 20 mu, currently has four production line of Methyl tetrahydrophthalic anhydride, the annual production capacity of 30000 tons, is the second chemical subsidiary of zhejiang Nanyang group. Due to the sales of the original chemical plant in short supply, and due to the original plant area couldn't meet the production demand, our further development was badly bound, we were urgently expanding the production scale to meet further development requirement. Therefore, Jiaying Nanyang Wanshixing chemical company is established accordingly. At the same time we establish close and long-term cooperation relationships with foreign companies, and introduce professional technician, adopt foreign advanced production technology and equipment, specialize in producing WNY series liquid epoxy resin curing agent - Methyl tetrahydrophthalic anhydride, we take use of Jiaying port regional advantages and resources advantages, to build the world's largest production base of anhydride curing agent.

We have strict production technology, advanced equipment, strong technical force, to ensure product quality stability, superior performance, we have accessed ISO9001 quality management system certification and 14001 environment system certification. As a member unit of the national epoxy resin technology application, we have gained a foothold in China and abroad in the field of electronics, electrical engineering, insulating materials and potting material, etc., we have a good reputation in the customers.

We adhere to the "guarantee the quality of first-class, keep the best level of credibility" business philosophy, adhere to the "customer first" the principle, provides the high quality service for the our customers. Welcome call us for business negotiations!

化工产品 chemical products

化学名称：甲基四氢基邻苯二甲酸酐

CAS：26590-20-5

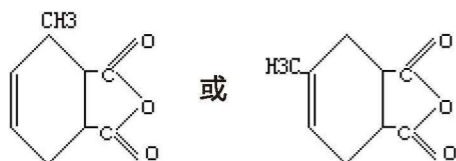

EC：247-830-1

简称：甲基四氢苯酐

英文名称：Methyl tetrahydrophthalic anhydride, MTHPA

分子式：C₉H₁₀O₃

结构式：

相对分子量：166.178 (按 1987 年国际相对原子质量)

图表： WNY 系列甲基四氢基邻苯二甲酸酐应符合表 1 要求：

项目	牌号	WNY1002	WNY1001	WNY1008
外观		浅黄色透明液体, 无机杂质		
色泽 (铂-钴) ≤		300 [#]	200 [#]	
密度, g/cm ³ , 20°C		1.21±0.05		
结晶点, °C		< -15	< 0	
粘度, Pa.s 25°C ≤		0.060	0.045	0.040
酸值, mgKOH/g		660-685		
酐基含量, %, ≥		41.5		
加热减量, %, 120°C ≤		2.00		

表 1

性能特点

纯度高、色泽浅：能直接制得或调制所需的各种色彩的环氧树脂制品。

粘度低：浇铸、灌封、浸渍的工艺性好，浇铸时可加入大量填充剂，使固化物性能优良。

性能稳定、凝固点低、适用期长：在室温下可以长期存放。

挥发性小：毒性低、加热损失小，毒性仅为胺类固化剂的二十分之一至四十分之一。

互溶性好：本产品能同所有环氧树脂互溶，混合粘度低，同时加热固化时体系收缩率小。

用途介绍

本产品是电子工业、机电工业产品必不可少的新型精细化工产品。广泛适用于灌封、浇铸、包封、层压、模塑、粘合、缠绕等工艺。环氧树脂固化剂：电子电气绝缘材料 (VPI 电机浸渍 / 干式变压器 / 互感器浇注 / 高压开关 / 电容器)，LED 数码管灌封胶，饰品披覆 (水晶滴塑打磨胶)，玻璃钢复合材料 (CNG 气瓶 / 风电叶片 / 电器套管)。

贮存、包装和运输

25 公斤塑料桶或 220 公斤铁桶包装，本品在运输过程中须防潮、防火、防水，贮存于干燥通风的仓库。

Chemical Name: Methyl tetrahydrophthalic anhydride (MTHPA)

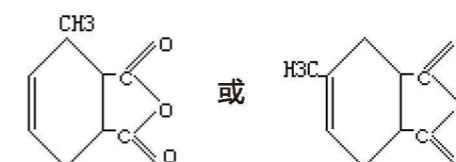

Molecular formula: C₉H₁₀O₃

Molecular weight: 166.17

CAS No: 26590-20-5

EC: 247-830-1

Structural formula:

Physical and chemical properties:

It has many excellent properties: high purity, light color, low viscosity, good processing properties, low volatility, low toxicity, low solidifying point, durable at room temperature and so on.

Quality indicators:

Item	Model	WNY1002	WNY1001	WNY1008
Appearance		Yellowish transparent liquid, no impurity		
Color&Lustre(Pa-Co)≤		300 [#]	200 [#]	
Density 20°C (g/cm ³)		1.21±0.05		
Freezing Point (°C)		< -15	< 0	
Viscosity 25°C (Pa.s) ≤		0.060	0.045	0.040
Acid Value(mgKOH/g)		660-685		
Acid anhydride (g) ≥		41.5		
Loss when heated % 120°C ≤		2.00		

Uses:

The product is a new material for electrical & mechanical products and widely used in casting, sealing, winding, and bonding of electronic components, automobile parts, transformers, high voltage capacitors, mutual inductors, and the impregnation of electronic components, resistors, hybrid integrated circuits. Moreover, it is used for fiberglass irrigation pipes, oil pipes, water filter boxes, insulative bushing, insulated paint and so on.

Storage, Packing & Transportation:

25kg plastic drum or 220kg metal pail. Avoid moisture, fire and water. Kept in dry and ventilating place.

G 集团公司 Group Company

南洋企业创建于1992年，以浙江南洋集团为母公司，旗下控股多家子公司。涉足化工、印染、箱包、农业等诸多产业领域，构筑起多远化产业科学连接，高效运行的产业体系。

企业所处浙江省嘉兴市，位于长江三角洲城市群的中心，高速发达的陆海空立体交通网络，使这里成为了中国乃至世界人流、物流、信息流聚集和扩散的中心。优势的地理位置使企业发展坐拥天时地利。以市场为导向，以科技创新为动力，以现代化管理为依托，南洋企业经过数十年的市场开拓，积累了丰厚的技术与人才存量。

南洋印染：拥有多套涤纶化纤染色加工生产线，可实现年生产加工能力2.5亿米；南洋塑料化工和南洋万事兴化工：拥有业界领先的甲基四氢苯酐生产流水线，年生产能力达4万5千吨，产品销售到全球各地，受到各界的广泛青睐；南洋箱包拥有12条专业手袋生产线，具有年产300多万只箱包的产能；南洋农业以人与自然为主体，开发建设观光农业生态园，融植物生态、餐馆娱乐、休闲观光、农家体验为一体，培育具有生命力的生态观光农业精品工程。

南洋产品以忠诚的质量方针，优质的服务体系赢得了终端市场的广泛认可，成就了企业品牌的基业。“以诚信经营未来”，南洋致力于发展成为多行业并举、相辅相承的知名企业集团。

Nanyang enterprise, founded in 1992, zhejiang nanyang group as the parent company, its holding subsidiaries. Involved in chemical industry, printing and dyeing, bags, agricultural, and many other industries, build far industrial scientific connection, efficient operation of the industrial system.

Enterprises in jiaxing city, zhejiang province, is located in the center of the Yangtze river delta urban agglomeration, armed with developed high-speed three-dimensional transport network, make it become the China and the world people, logistics, information gathering and the center of the diffusion. Enterprise development advantages of geographic location is sitting on the right place, right time. Market-oriented, science and technology innovation as the power, which is based on modern management, after decades of nanyang enterprise market development, accumulated the rich stock of technology and talents.

Nanyang printing and dyeing: have multiple sets of polyester dyeing processing production line, which can realize annual production and processing capacity of 250 million meters.

Nanyang plastic chemical and nanyang everything chemical: has the industry leading four hydrogen methyl benzene anhydride production lines, annual production capacity of 45000 tons, product sales to all over the world, widely favored by people from all walks of life.

Nanyang bags has 12 professional handbags production line with annual output of more than 300 production capacity of ten thousand bags only.

Nanyang agricultural to man and nature as the main body, development construction of sightseeing agriculture ecology garden, plant ecology, restaurants, entertainment, leisure tourism, farming experience, fostering vitality of ecological sightseeing agriculture excellent project.

Loyalty in nanyang product quality policy, quality of service system in the terminal market won wide recognition, achievement enterprise brand foundation. "The good faith management" in the future, nanyang committed to the development of a more industry simultaneously, full accord of famous enterprise group
